

Recommended – also watch next video – How Selenium interacts with PhantomJS

Today we will learn

1. How to download PhantomJS
2. How to add in selenium project
3. How to run selenium test on PhantomJS

How to download PhantomJS

Step 1

Download phantomJS for your OS

<http://phantomjs.org/download.html>

Step 2 (optional)

Download PhantomJS Driver

Not Required with latest PhantomJS

<https://mvnrepository.com/artifact/com.codeborne/phantomjsdriver/1.4.1>

(The latest release of PhantomJS has Ghost Driver integrated and there is no need to install it separately.)

---

How to run Selenium Test on PhantomJS

Step 1

Set system property – phantomjs.binary.path

```
System.setProperty("phantomjs.binary.path", "location of phantomjs exe");
```

Step 2

Create object for PhantomJSDriver class

```
WebDriver driver = new PhantomJSDriver();
```

Step 3

Create and Run the Test
